[PEGEGOG] Editor Decision

2022-11-25 11:27 AM

Dear Akhmad Asyari (Author):

We have reached a decision regarding your submission to Pegem Journal of Education and Instruction, "Students' Perceptions and Attitudes toward Learning Based on Learning Management System: A Future Recommendation on Blended Learning Design".

Our decision is: **Revisions Required**

Reviewer A:

1. The title has described the subject of the manuscript adequately, clearly, precisely and does not have multiple interpretations.
2. Abstract does not cover the manuscript thoroughly, especially research methods. Briefly state the purpose of the study, methods used, results, article contributions and key conclusions. In the introduction section, it is necessary to show the innovation or novelty made by the author through gap analysis and the purpose of the article review must be explained properly
1. It is necessary to explain sampling techniques, data analysis techniques, and questionnaire instruments. It is necessary to clarify whether the instruments were developed independently or were standard instruments from previous researchers. If the questionnaire is developed independently, its validity must be clear.
5. Conclusions should be simple, concise, and clear. It summarizes several ideas or statements that have been previously described in the content section, but there is no need to present data in the form of numbers. References that are up to date references and are very supportive in better reviewing research problems

Recommendation: Revisions Required

Reviewer B:

In general, this research is interesting regarding the recent transition from Covid 19 to post-Covid 19 conditions. Some issues need more elaboration on comparing Moodle LMS with others, an explanation of the previous or recent studies on whether the presence of a lecturer is necessary or not in learning with LMS., and the importance of adding some references in discussing some findings on students' perceptions and attitude. Details of my comments can be read in the manuscript.
