Comments Reports for Manuscript # 1144-JSS

Final Decision: Minor Revision

1st Review:

This research aims to investigate the effectiveness of improving undergraduate qualifications for primary school teachers. It is mainly a qualitative research. The theoretical framework and context of the study are well detailed. The methodology is rigorous, research instruments used are validated. The results meet the research questions. Even if the research is about Indonesia, it is interesting for researchers who want to translate research to other contexts Figure 2 must be corrected (the percentages are in duplicate)

2nd Review:

1. The author has done good qualitative work however, needs to cross-check grammatical errors well before submission and as well use simple English language for the readership.
2. The paper did not include the reference URL of the doi numbers to the standard of APA system (reference style not sure).
3. The methods of the study did not indicate the total participants in the questionnaires and interviews for the primary data. They is the need for inclusion, how many were interview and as well as those who answered the questionnaires.
4. Generally, the paper is unique for consideration, with the structure very professional for publication.
5. The study will contribute to the existing literature.
